

18 December 2007

20:00 - 22:00

EIF-FAS JOINT DINNER DEBATE

How intelligent solutions can keep Europe moving safely

The ability for people to get to their destinations safely and efficiently across the EU's single market and cutting-edge know-how, adequate investments and appropriate policies are key in tackling this issue.

With a focus on infrastructure and traffic management, the aim of this dinner debate was to provide a better understanding of possible technological solutions for safer and more efficient systems, including goods distribution and cross-border traffic information systems.

In co-operation with the Forum for the Automobile and Society - www.autoandsociety.com*

Founded in 2000, the Forum for the Automobile and Society is Brussels' leading independent debating arena for discussion of issues which are of relevance to the automotive sector and its role in society. It brings together stakeholders in the Automotive Community, including motorists, vehicle makers, dealers, component suppliers and automotive logistics. The Forum holds regular public meetings in Brussels to stimulate debate on policy issues affecting the future role of the automobile.
